NEW GRANT PROGRAM AWARD!

Supporting State and Community Innovations in Dementia-Specific Respite Programs and Services

- October 31, 2023 award to the Alzheimer's Association
- \$5M/Year for 5 years with 25% match from grantee
- 80% of total goes to grants to community-based providers to deliver respite
- 20% of total goes to infrastructure, education/technical assistance and evaluation

STAY TUNED!

4

4

ACL/AoA ADPI Grant/Contract Funding FY 2024

Grants

- State, Community and Tribal Grants
- Respite Innovations
- National Alzheimer's Disease Call Center (funding for the Alzheimer's Association call center)

Contracts

- National Alzheimer's and Dementia Resource Center (<https://nadrc.acl.gov/home>)
- Funds to ACL Title VI contract for dementia activities in Tribal Communities

5

National Alzheimer's and Dementia Resource Center UPCOMING WEBINAR

Finding the Way in Dementia Care: Use of Care Navigators for People Living with Dementia and their Caregivers.

February 6, 2024, from 3-4 p.m. ET

CAIz Connect, (through California Department of Aging (CDA), offers dementia care management services to people living with dementia and their caregivers in Imperial, Marin, and Ventura counties, using the Care Ecosystem (CE) and HomeMeds evidence-based programs.

Kansas, OCCK, Inc. is implementing the CE in rural communities. Cognitive Care Navigators help the CE team understand the day-to-day issues experienced by people living with dementia and their caregivers and provide needed services and supports.

[Additional webinar information and registration form can be found HERE.](#)

6

6

National Alzheimer's and Dementia Resource Center Recent Webinar

Strengthening the Dementia Capable Workforce: Dementia Training for Intellectual and Developmental Disabilities (IDD) Service Providers.

As the population of individuals living with IDD ages, so does the incidence of dementia. Communities need to be prepared to serve and support them. This webinar explored educational programs utilized when training providers of aging IDD services, and how **Ohio** began to build systems to support individuals, families, and providers within local communities. Lessons learned, impact findings from educational sessions, accessible and replicable resources, and information on the overall system changes will be shared. (1800 registered/1100 attendees)

The recording of the webinar and the presentation deck will be posted at
<https://nadrc.acl.gov/home>

7

7

National Alzheimer's and Dementia Resource Center Recent Webinar

Applying the National Strategy to Support Family Caregivers to Dementia Programs.

The 2022 National Strategy to Support Family Caregivers was developed to support caregivers of all ages, regardless of where they live or their specific caregiving situation. The Strategy includes five overarching goals and 350 corresponding actions, while not addressing specific populations of caregivers. While the goals and actions contained within the Strategy are not dementia specific, they can be applied to dementia caregiving. This webinar focuses on the ways in which the goals can apply specifically to caregivers of people living with dementia and services designed to support such caregivers. (1200 registered/589 attendees)

The recording of the webinar and the presentation deck will be posted at
<https://nadrc.acl.gov/home>

8

8

Lifespan Respite Program State Grant Dementia Highlights

VIRGINIA - Increasing the number and diversity of caregivers who receive respite services through the addition of 100 additional dementia caregivers. So far, this state's program has served: 281 dementia caregivers (236 is the 5-year goal), which is 119% of the goal achieved.

COLORADO - Dementia Training Courses. Dementia 101 educates attendees on the top ten risk factors, warning signs, and quality of life issues for those with dementia and their caregivers, was delivered virtually and in person to a total of 2,676 attendees. (CO)

ARIZONA - Memory cafes: program provides socialization for persons with dementia and the opportunity to participate in activities with certified and trained professionals. A Perfect Place offers enjoyable engagement activities and exploration helping individuals living with dementia, Alzheimer's, Parkinson's, or stroke recovery find new talents and hobbies. (AZ)

9

9

ACL/AoA Caregiver Activities of National Significance Grant Program*

- Using the framework provided by the [2022 National Strategy to Support Family Caregivers](#) (the Strategy), to advance the capacity of the National Family Caregiver Support Program (NFCSP – OAA, Title III-E) and the Native American Caregiver Support Program (NACSP-OAA, Title VI-C) to better recognize and support family caregivers.
- **Goal:** greater recognition, support, and inclusion of the family caregivers served by the OAA Title III-E and VI-C programs and greater alignment with other efforts to improve supports to family caregivers to ensure that the NFCSP and NACSP are well-positioned to respond to, and evolve with, a rapidly shifting policy and service delivery landscape.
- **There is a grant project focusing on each of the specific five priority/goal areas of the Strategy:**
 1. **Increasing awareness of, and outreach to, family caregivers**
 2. **Advancing inclusion and engagement of family caregivers within care teams**
 3. **Advancing innovations in family caregiver services and supports**
 4. **Strengthening financial and workplace security of family caregivers**
 5. **Advancing a family caregiver national research and data collection strategy**

*Four cooperative agreements awarded Sept 2022; Fifth cooperative agreement to be awarded Feb 2024.

10

10

ACL Assistive Technology Program

North Carolina: Public awareness and education events for caregivers and dementia groups across the state. Additional sessions scheduled for January and February of 2024. They have active participation in the Division of Aging and Adult Services (DAAS) "All Ages/All Stages" plan development, which is the aging plan to be submitted to the governor by May/June 2024.

Georgia: Tools for Life (TFL)/Georgia Tech Center for Inclusive Design and Innovation (CIDI) Hosted an open house showcasing their Dementia Lab, and many items were demonstrated. Participated in educational opportunities including information Fair. Serves on the Advisory Board for the Culture Change Network of Georgia (CCNG). CCNG is transforming organizations that care for older people by training and advocacy for person-centered care. Much of the work of CCNG is working with Alzheimer's and other Dementia. Launching should have a new website soon that will include information about their Aging in Place and Dementia Lab.

North Dakota: The North Dakota Alzheimer's Association (NDAA) and the North Dakota Assistive technology program entered into an agreement to address staff training initiatives and expansion of the AT Ambassadors program. Five of the seventeen volunteer AT Ambassadors are staff of the ND Alzheimer's Association! Knowledge and appreciation of assistive technology has expanded dramatically (i.e. 1 NDAA employee presented/exhibited at eight different events last year.

11

11

National Institute on Disability, Independent Living, and Rehabilitation Research (NIDILRR)

The Center for Enhancing Neurocognitive Health, Abilities, Networks, and Community Engagement (ENHANCE).

- Using a sample of individuals with mild cognitive impairment (early dementia), post stroke, and TBI, investigators are developing a novel systematic approach to explore how discourse (e.g., verbosity, topic maintenance, speech rate) relates to cognition (e.g., inhibition, working memory, generation/fluency) for these populations of people with cognitive disabilities. The aim is to develop a comprehensive measure for communication challenges that are predictors of cognitive function in daily activities.
- The investigators have a first draft of a book for publication titled The Potential of Extended Reality Solutions to Support Older Adults with and without Cognitive Impairments. This book is meant for anyone who is interested in the application of emerging XR technologies for older adults with and without cognitive disabilities.

Research and Education to Support the Science of Independent Living for Inclusion and Engagement: National Center of Excellence RRTC (RESILIENCE RRTC)

- Investigators are conducting a randomized control trial of the modified CAPABLE intervention for individuals with MCI/dementia and their care partners. The original CAPABLE intervention excluded individuals with MCI/dementia. Data is complete for half of the sample. The study is ongoing.

PUBLIC HEALTH AND DEMENTIA CAREGIVING

NEW PUBLIC HEALTH CURRICULUM MODULE

- The Alzheimer's Association launched the interactive public health curriculum on public health and dementia caregiving created in partnership with CDC, BOLD Public Health Center of Excellence on Dementia Caregiving, and Emory University.

Public Health and Dementia Caregiving

START

This course covers who dementia caregivers are, why dementia caregiving is a public health issue, and what public health organizations can do about dementia caregiving. Public health examples and case studies will be used to support and assess understanding. This module is intended for public health students, educators and professionals to learn about the public health impacts of dementia caregiving. If you are a dementia caregiver looking for online education and resources, please visit our [Living with Alzheimer's For Caregivers](#) course.

- **Free**, interactive public health curriculum on public health's role in addressing dementia caregiving
- Flier, guides, and link to module are all available at alz.org/publichealthcurriculum
- Designed for public health professionals, students, or educators; not designed for caregivers themselves

24

HBI ROAD MAP FOR INDIAN COUNTRY UPDATE

- Leadership Committee Kickoff
 - 19 Leadership Committee Members and 2 Co-Chairs
 - 79% (15/19) have a tribal affiliation
 - Also have federal liaisons from ACL, CMS, DOD, HHS, HRSA, and NIH
- Open Input Period - 2+ months
 - Written open input period
 - 7 virtual input discussions facilitated with ACL and IHS
- In-Person Leadership Committee Meeting
 - First week of March in Oklahoma City, OK
 - Will review public input and discuss structure of the next edition

Share the [Road Map for Indian Country](#) page

alz.org/PublicHealthIndianCountry

25

The collage features several key documents:

- Issue Maps:** Five individual maps focusing on:
 - Enhancing Community Clinical Linkages
 - Advancing Health Equity
 - Reducing Risk of Cognitive Impairment
 - Enabling Early Detection and Diagnosis
 - Supporting Caregivers
- Executive Summary:** A central document titled "State and Local Road Map for Public Health, 2023-2027" with a "WHAT'S NEW" section.
- Implementation Guide:** A document titled "Prioritizing Action in the Healthy Brain Initiative Road Map" containing "Eight Questions for Thoughtful Action" and "Key questions to select HBI Road Map actions and key planning".

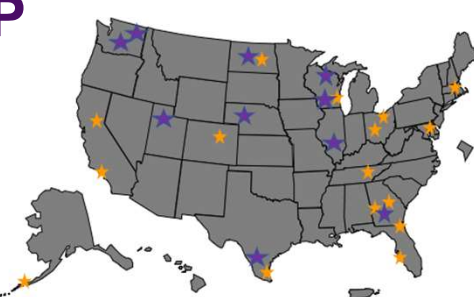

Logos for the Alzheimer's Association, CDC, and the Healthy Brain Initiative are visible throughout the collage.

Webinar Series

Statewide Dementia Screening Linked to Diagnostic and Social Services Implementation Strategies and Lessons Learned

Nathaniel Chin, MD
Associate Professor, University of Wisconsin (UW) Department of Medicine, Geriatric Division
 Medical Director & Clinical Care Co-Leader, Wisconsin ADRC
 Medical Director, Wisconsin Registry for Alzheimer's Prevention (WRAP) Study
 Associate Director, Geriatric Memory Program, UW Hospitals and Clinics

Krista Pfister, MSW, APSW
Clinical Social Worker, University of Wisconsin Geriatric Clinic-Fitchburg

Wednesday, January 31, 2024
12 – 1 pm EST

The BOLD Public Health Center of Excellence on Early Detection of Dementia is pleased to offer our second in our series of conversations about health system interventions to promote earlier dementia detection as a pathway to better care and outcomes.

Please join us to hear from two members from University of Wisconsin Alzheimer's Disease Resource Center (ADRC) and UW Health Memory Assessment Clinic, Dr. Nathaniel Chin and Ms. Krista Pfister.

This webinar is open to the public, so please share this webinar with anyone that may be interested in attending.

Webinar -- Public Health Approaches to Dementia Caregiving

Successful Public Health Approaches in Dementia Caregiving: *Georgia* A Virtual Roundtable Series

In each episode of this virtual round-table series *we will highlight the story of one state* that has successfully implemented a state-wide, innovative, and integrative approach to advancing its dementia caregiving goals. The session will begin with an overview of the state's past, current and future efforts in dementia caregiving, followed by an interactive conversation and Q&A with the attendees about key takeaways and ideas for action they can take in their states and communities. This series offers a great opportunity for knowledge exchange, peer-learning and idea generation. In this episode we will present the story of *Georgia*.

Elizabeth Head, MPH

HEALTHY BRAIN INITIATIVE
People with Intellectual and Developmental Disabilities

6 Pillars of Brain Health

6 PILLARS OF BRAIN HEALTH
People with Intellectual and Developmental Disability

PROMOTING BRAIN HEALTH EQUITY FOR ALL | WWW.HEALTHMATTERSPROGRAM.ORG

BRAIN HEALTH supports people to live, learn, work, play, and live as they age!

MOVE MORE: Physical Fitness
Regular exercise improves blood flow and oxygen, and stimulates chemical changes that enhance learning, mood, and thinking and lower risk of Alzheimer's disease.

LEARN MORE: Mental Fitness
Mental exercises like physical exercise may increase your brain's functioning and promote new brain cell growth, decreasing your likelihood of developing dementia.

LIVE MORE: Social Connection
Active social lives and meaningful connection with family and friends are good for brain health and can prevent memory loss.

EAT WELL: Food and Nutrition
Food rich in antioxidants can reduce the harmful effects of oxidative and environmental factors on the insulation of brain cells with age.

BE WELL: Regular Health Checks
Annual engaged health checks can reduce the risks of hypertension, diabetes, obesity, depression, heart disease, high cholesterol, and smoking and support brain health.

Know the Signs & Symptoms

- Loss of daily living skills (difficulty with usual activities, changes in daily routine, sleeping or eating habits, inability to choose clothing)
- Changes in personality, irritability, frustration, increased aggression, uncharacteristic fears, inability to focus, periods of inactivity, disinterest in activities previously enjoyed
- Increase in stereotyped behavioral traits (past or often subconscious)
- Difficulties remembering names of people previously known

Alzheimer's Disease and Other Dementias: Changing the Myth

ALZHEIMER'S DISEASE AND RELATED DEMENTIAS
People with Intellectual and Developmental Disability

PROMOTING BRAIN HEALTH EQUITY FOR ALL | WWW.HEALTHMATTERSPROGRAM.ORG

Approximately 6.5 million people in the United States have an intellectual disability (ID). Approximately 1 - 3 percent of the global population has an intellectual disability - or more than 200 million people.

Number of adults with IDD age 60 years and older may double from \$4.8B in 2000 to 12 billion by 2050 resulting in a need for more services.

About 10000 (2%) of the 100000 older people with IDD will experience a form of Alzheimer's disease and related dementias (ADRD) after age 60 (increases with age).

People with Down syndrome have a higher risk, with about 1 in 3 developing dementia, usually Alzheimer's disease (AD), with a mean age of onset or diagnosis of AD at 33.

People with intellectual and developmental disability (IDD) have healthy brains.

ADRD are NOT a natural course of aging for people with IDD.

People with IDD like their nondisabled peers can optimize cognitive, emotional, psychological and behavioral functioning with or without dementia to cope with life situations.

Healthy lifestyles among people with IDD can be supported by considering the impact of structural and social determinants on healthcare and health outcomes.

CHANGING THE MYTH

- People with intellectual and developmental disability (IDD) have healthy brains.
- ADRD are NOT a natural course of aging for people with IDD.
- People with IDD like their nondisabled peers can optimize cognitive, emotional, psychological and behavioral functioning with or without dementia to cope with life situations.
- Healthy lifestyles among people with IDD can be supported by considering the impact of structural and social determinants on healthcare and health outcomes.

Know the Signs & Symptoms

- Loss of language and other communication and social skills
- Changes in coordination (increased difficulty with usual motor coordination or accidents and falls, difficulty staying on task)
- Development of seizures not previously seen
- Disorientation to time and place or getting lost in familiar environments
- Repeated missing incidents
- Changes in hearing and vision
- Hyperactive reflexes

*Meets the Administration for Community Living OAA Title III-D Evidence-Based Requirements

1 THE TRAINING
HealthMatters Program Train-the-Trainer Certified instructor Workshop

- 6-hour online
- organize and start a tailored physical activity & health education program for people with IDD

3 THE PROGRAM
12-Week HealthMatters Program for People with IDD

- group physical activity and health education
- 36 lessons, 3x per week, 4-6 hours weekly

2 THE CURRICULUM
Health Matters: The Exercise and Nutrition Health Education Curriculum for People with Developmental Disabilities

- adaptable instructor scripts for each lesson
- participant handouts & worksheets
- 59 lessons on health, exercise, nutrition, choice-making, self determination

4 THE CLASSROOM
Virtual Coach

- multimodal supplement to the Curriculum
- 36 lessons, resources, infographics, videos
- virtual support allows for an interactive communication, feedback, resource sharing, and collaborative learning

Health Resources and Services Administration Dementia Activities 2023

January 22, 2024

Joan Weiss, PhD, RN, CNRP, FAAN
Deputy Director, Division of Medicine and Dentistry
Bureau of Health Workforce (BHW)

Vision: Healthy Communities, Healthy People

44

Health Resources and Services Administration

Dementia Education and Training Activities 2021-2023

45

Geriatrics Workforce Enhancement Program (GWEP)

- In Fiscal Year (FY) 2021-22 the GWEPs provided 673 interprofessional educational offerings on dementia to 130,012 learners.
- In Fiscal Year 2022-23 the GWEP provided 529 interprofessional educational offerings on dementia to 113,351 learners.

46

Geriatrics Workforce Enhancement Program (GWEP)

- HRSA has several modules addressing Alzheimer's Disease and Related Dementia (ADRD) on the [HRSA Train Health Care Workers About Dementia page](#)
- 16 modules on ADRD Topics
- 9 modules on Caregiving Topics
- In 2023 there were
 - 14,104 views of the HRSA dementia page

47

GWEP COVID-19 Education and Training

- In FY2021-FY2022 HRSA provided \$2.25 million in competitive supplemental funding to 12 GWEPs
- **Purpose:** Develop 24 modules addressing COVID-19 specific education and training for the nursing home workforce, nursing home residents, **including those living with dementia**, and their family and caregivers, to improve care to nursing home residents.
- These modules are undergoing clearance in preparation of uploading them on the HRSA dementia website mentioned in previous slide.

48

GWEP Nursing Home Education and Training

- In FY2023, \$2.28 million in administrative supplements were awarded to 48 GWEP grant recipients
- Purpose: Support curriculum development on care of older adults residing in nursing homes, **including care of persons living with dementia**, within the context of the Age-Friendly Health Systems 4Ms Framework.
- Goal: Increase the number of nursing staff who elect to practice in nursing homes after graduation.

49

Dementia Specialists Report to Congress

- FY2021-FY2023: HRSA supported development of a Report to Congress on **Current Capacity of Dementia Specialists** in collaboration with ASPE
- Report includes provider shortages and screening capacity, barriers for early detection of ADRD and adequate access to care, and recommendations regarding provider shortages and diagnostic pathways.

50

GWEP AFHS Status

- Institute for Healthcare Improvement
Age-Friendly Recognition (includes mentation) through
January 2024
 - **Level-1: Participant**
 - 272 primary care practice sites
 - 48 GWEP grant recipients
 - **Level-2: Committed to Care Excellence**
 - 144 primary care practice sites
 - 31 GWEP grant recipients

INDIAN HEALTH SERVICE

Grants and Program Awards Addressing Dementia in Indian Country: Models of Care

“...to support the development of models of comprehensive and sustainable dementia care and services in Tribal and Urban Indian communities that are responsive to the needs of persons living with dementia and their caregivers.”

2024 – Anticipated Notice of Funding Opportunity (Forecast)

- Targeted toward programs with established efforts to address dementia
- 3 years additional funding support
- Further development of the models of care
- Sustainability

59

INDIAN HEALTH SERVICE

Additional Funding Support: Capacity Building

Dental Clinic Early Dementia Detection Initiative Continues

- Partnership with IHS Division of Oral Health
- 2nd round of 5 IHS and Tribal facilities
 - Support to integrate cognitive assessment and referrals into dental care

Community Health Representatives (CHR) Dementia Detection Initiative Launched

- Partnership with IHS CHR program
- 6 Tribal sites from 6 IHS areas selected and funded to train CHRs to integrate detection of cognitive impairment into their usual workflow
 - Training in use of tools to detect (e.g. mini-cog)
 - Follow-up referrals and support services
 - Partner with Oklahoma University Dementia Care Network (GWEP) for dementia training

Geriatric Emergency Department Accreditation (GEDA) Initiative Continues

- Partnerships with IHS Division of Nursing
- Currently 9 IHS and Tribal sites with Bronze accreditation
- New cohort recruited - 4 confirmed and 2 tentative
 - New (Bronze) and advancing (Silver)

60

Workforce Development

Indian Health Geriatric Scholars Pilot Continues

- 2023 GeriScholars From 14 sites, 7 IHS, 6 Tribal, and 1 Urban representing 7 IHS Areas have completed intensive training.
- Plans for local improvement including:
 - dementia recognition, evaluation and diagnostic process, polypharmacy, annual wellness visit with cognitive assessment, goals of care discussions, social isolation

Geriatric Nurse Fellowship Pilot Launched

- Partnership with the IHS Division of Nursing
- 19 applicants
- Training options to meet needs of nurses in a variety of roles
- Funding to sponsoring program to support time for training
- Goal directed – with commitment to improve care

Clinical and Community Services 2024 Meeting (in development)

- Summer 2024
- Training in detection of cognitive impairment
- Opportunity for growing community of “champions”, including grantees, GeriScholars, Nurse Geriatric Fellows, CHRs, and Oral Health professionals to share with each other and others

61

Workforce Development

Indian Country Dementia Clinical and Caregiver ECHOs Continue

- Monthly with archives for viewing
- Clinical: case-based learning to strengthen primary care knowledge and confidence
- Caregiver: training and mentorship for Indian Health staff providing coaching and support for caregivers
- 526 participants in 2023 since launch in May
- Greatest training need: care planning, management, and referrals (72%)

Training and Technical Assistance Contract RFQ Out for Open Bid – Closes 1/19

62

Outreach and Awareness

Expanding Efforts

- Pilot regional elder-focused health and wellness event
- Communications support contractor funded
 - e-news, video and photo assets, website development
- National Caregiver Month blog and social media campaign
- 8 other Alzheimer's and older adult observances via social media
- Tribal leader updates highlighting work across IHS, Tribal, and Urban Indian communities
- YouTube channel for trainings and webinars
- Online calendar of events
- Continuing to grow listserv and community

Program Support and Data

- **Enhanced Technical Assistance to IHS Grantees**
 - Site visits to all grantees
 - Learning collaborative
- **Data Dashboard in development**
- **First Annual Report in draft**

Alzheimer's Disease and Related Dementias Research Update

Advisory Council on Alzheimer's Research, Care, and Services Meeting

Richard J. Hodes, M.D.
Director, NIA
January 22, 2024

65

65

FY 2024 Appropriations Status

- **House FY 2024 appropriations bill:**
 - On June 14, 2023, the House Labor-HHS spending bill advanced out of subcommittee. The bill must still be considered by the full committee and then passed by the House. If enacted:
 - \$43 billion for NIH, a decrease of \$3.8 billion from the FY 2023 enacted level.
 - **\$4.41 billion for NIA** – essentially flat-funding relative to the FY 2023 enacted level.
- **Senate FY 2024 appropriations bill:**
 - On July 27, 2023, the Senate Labor-HHS spending bill advanced out of the full Appropriations committee. The bill must still be passed by the Senate. If enacted:
 - \$47.8 billion for NIH, an increase of \$943 million in discretionary spending over FY 2023.
 - **\$4.51 billion for NIA**, an increase of more than \$100 million over the FY 2023 enacted level.
 - \$90 million increase for Alzheimer's and related dementias research.
 - \$12 million for palliative care research.
 - Overall, \$100 million in increased NIH funding for dementia research:
 - \$90 million to NIA (*referenced above*), plus \$10 million to NINDS.
- NIH & most other federal agencies are **currently funded through Mar. 8, 2024, via a Continuing Resolution.**

66

Interim Allocations for Competing Research Grant Awards, FY 2024

CSR-Reviewed Research Applications (Percentile Based)				
	General Pay Line, <\$500K	General Pay Line, ≥\$500K	AD/ADRD Pay Line, <\$5M	AD/ADRD Pay Line ≥\$5M
All applications; exceptions see website	8%	5%	12%	10%
N.I. R01s	11%	8%	15%	13%
E.S.I. R01s	13%	10%	17%	15%

New Investigator (N.I.): An applicant who has not received a prior R01 award or its equivalent.

Early-Stage Investigator (E.S.I.): A new investigator who is within 10 years of finishing research training.

AD/ADRD: Research on Alzheimer's disease and Alzheimer's disease-related dementias.

67

Interim Pay Lines, FY 2024

NIA-Reviewed Applications (Overall Impact Score based)		
	General Pay Line	AD/ADRD Pay Line
Program projects	10	12
Other NIA-reviewed research	10	12
Career development awards	18	25
Fellowship awards	20	30

71

72

NASEM Study on Research Priorities for Preventing and Treating AD/ADRD

- **Task order established:** March 27, 2023
The agreement directs NIA, working with NINDS, to **enter into an agreement with NASEM within 60 days of enactment of this Act to identify research priorities for preventing and treating AD/ADRD.** An ad hoc committee of NASEM will conduct a study and recommend research priorities to advance the prevention and treatment of AD/ADRD. In conducting its study, the committee will:
 - **Committee established:** Fall 2023
 - **Two meetings thus far**
 - **Most recent public meeting:** Jan 16-17, 2024
 - **Final report anticipated:** Jan-Mar 2025
- 1) Examine and assess the current state of biomedical research aimed at preventing and effectively treating AD/ADRD, along the R&D pipeline from basic to translational to clinical research;
 - 2) Assess the evidence on nonpharmacological interventions aimed at preventing and treating AD/ADRD;
 - 3) Identify key barriers to advancing AD/ADRD prevention and treatment (e.g., infrastructure challenges that impede large scale precision medicine approaches, inadequate biomarkers for assessing response to treatment, lack of diversity in biobanks and clinical trials), and opportunities to address these key barriers and catalyze advances across the field;
 - 4) Explore the most promising areas of research into preventing and treating AD/ADRD.

<https://www.nationalacademies.org/our-work/research-priorities-for-preventing-and-treating-alzheimers-disease-and-related-dementias>

73

73

Recent AD/ADRD Cleared Concepts From NACA Meetings

Approved concepts indicate areas of special interest for NIA and often evolve into funding opportunity announcements to spur activity in given areas of research.

Select Concepts:

- Centers on the Demography and Economics of Aging, Including AD/ADRD, and Coordinating Center
- Consortium for Neuroscience AD/ADRD in Low- and Middle-Income Countries
- Deriving Common Data Elements From Real-World Data for AD/ADRD
- Exploring Proteogenomic Approaches to Unravel the Mechanisms of Mis-folded Protein Accumulation in Tauopathies
- Multi-Scale Models Bridging Levels Of Analysis In Aging and AD/ADRD
- Open Measurement Coordinating Network for Non-Pharmacological AD/ADRD Primary Prevention Trials
- Quantitative Systems Pharmacology Approach to Develop Predictive Models of Differential Responsiveness to Treatment
- Small Research Grant Program for the Next Generation of Researchers in Low- And Middle-Income Countries for Aging and AD/ADRD Research
- Translational Bioinformatics and Experimental Approaches to Advance Drug Repositioning and Combination Therapy Development for AD/ADRD

For the full list of cleared concepts: <https://www.nia.nih.gov/approved-concepts>

74

74

Recently Published AD/ADRD Funding Opportunities

- **Seamless Early-Stage Clinical Drug Development (Phase 1 to 2a) for Novel therapeutic Agents for the Spectrum of Alzheimer's Disease (AD) and AD-related Dementias (ADRD) (UG3/UH3 Clinical Trial Required)/[PAR-23-274](#)** to support the bundling of Phase 1 through Phase 2a clinical trials to help streamline and accelerate the evaluation of promising novel AD/ADRD drug candidates. (first application due date is Feb. 21, 2024)
- **Building Neuroscience Research Infrastructure for Alzheimer's Disease (AD) and AD-Related Dementias (ADRD) in Africa (UG3/UH3 Clinical Trial Not Allowed)/[RFA-AG-24-027](#)** to support the development or enhancement of research infrastructure for AD/ADRD in Africa. (apply by Feb. 14, 2024)

75

EUREKA Challenge for Early Prediction of AD/ADRD

- A challenge prize competition to **discover the best data, methods, and strategies for the early prediction of Alzheimer's and related dementias** launched in September 2023.
- Phase 1 submissions are due on January 31, 2024.
- The challenge includes an emphasis on **building diverse teams and solutions that generalize to groups that historically have been excluded from participation in AD/ADRD research.**
- The challenge intends to offer cash awards totaling \$650,000.

PREPARE: Pioneering Research for Early Prediction of Alzheimer's and Related Dementias EUREKA Challenge

76

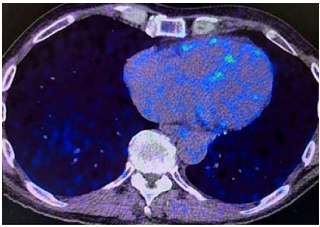

Research Directions Post-Approval of a Disease Modifying Therapy

77

77

Detecting & Diagnosing AD/ADRD at Earlier Stages

- Identifying AD/ADRD at early stages, when interventions are most likely to be effective, requires reliable and accessible biomarkers and diagnostic tools.

<p>Imaging</p> 	<p>Blood biomarkers</p> 	<p>Data tools</p> 
<p>¹⁸F-dopamine PET scanning</p>	<p>PrecisionAD2</p>	<p>eRADAR</p>

NIH National Institute on Aging

78

78

Evolving Technologies for Drug Delivery

- **Subcutaneous administration of monoclonal antibodies**
 - Currently approved form of lecanemab is administered via IV infusion (aducanumab and donanemab also delivered in this manner).
 - Recent data on subcutaneous administration of lecanemab showed similar efficacy to IV infusion; Eisai has announced plans to submit application for approval of this form
- **Focused ultrasound to temporarily 'open' the blood-brain barrier**
 - NIA-funded foundational work demonstrated focused ultrasound could enhance delivery of therapeutics across the blood-brain barrier
- **"Trojan Horse" method**
 - Attaching therapeutics to compounds that can cross the blood-brain barrier (e.g., trontinemab = gantenerumab + "brain shuttle"; TNF-alpha inhibitors)

79

Addressing ARIA and Other Side Effects

- The research field is working on developing countermeasures for ARIA
- Enhanced drug delivery (as described on the previous slide) may reduce levels of ARIA and related side effects
 - Focused ultrasound may reduce adverse effects normally associated with monoclonal antibodies
 - Data presented in October 2023 at the Clinical Trials on Alzheimer's Disease (CTAD) conference on trontinemab (gantenerumab + "brain shuttle") showed relatively low ARIA rates (<10% of participants)
- NINDS-NIA workshop on ARIA in September 2023 to share progress and identify research gaps and opportunities

80

Developing Combination Therapies

- One drug alone is unlikely to be sufficient to address the complexity of AD
- NIA is funding trials of combination therapies, including:

Trial Name	Drug Description	Phase	Population	Funding End Date
DIAN-TU: Tau Next Generation Prevention Trial	Combination of an anti-tau immunotherapy with lecanemab , an anti-amyloid antibody	III	Cognitively healthy or mildly impaired adults who are Alzheimer's disease genetic mutation carriers.	2025
Alzheimer's Tau Platform (ATP) Clinical Trial	2 different anti-tau therapies alone and in combination with anti-amyloid therapy	III	Adults ages 60 and older with asymptomatic Alzheimer's or mild cognitive impairment	2028

81

Developing a Broad Range of Interventions to Prevent and Treat Dementia

- NIA supports trials of a variety of interventions to prevent and treat Alzheimer's and related dementias
- Includes drug therapies as well as lifestyle and behavioral interventions
- [SMART Trial](#): Multidomain personalized risk-reduction intervention focused on health and lifestyle changes led to modest improvements in cognition, dementia risk factors, and quality of life compared to control

82

Summary of Recent Progress in AD

		2016	2023
Diagnostics	<ul style="list-style-type: none"> • Amyloid PET agents 		<ul style="list-style-type: none"> • Amyloid PET agents • Tau PET agents • Blood biomarkers for amyloid and tau (e.g., PrecivityAD/PrecivityAD2) • Data-based tools (e.g., eRADAR) • Electronic/digital assessments
Symptom Management	<ul style="list-style-type: none"> • Cholinesterase inhibitors (e.g., donepezil) • Glutamate regulators (e.g., memantine) 		<p>Pharmacological options:</p> <ul style="list-style-type: none"> • Brexpiprazole for agitation related to AD (approved 2023) • Cholinesterase inhibitors (e.g., donepezil) • Glutamate regulators (e.g., memantine) <p>Non-drug options:</p> <ul style="list-style-type: none"> • Interventions for care and caregivers

83

83

Summary of Recent Progress in AD

		2016	2023
Disease-modifying therapies	None		<ul style="list-style-type: none"> • Lecanemab (FDA traditional approval in 2023) • Donanemab (FDA decision expected Q1 2024) • Several additional therapies in the pipeline, with more diverse targets than ever before
Risk reduction	None		<ul style="list-style-type: none"> • Intensive blood pressure control • Hearing interventions • Personalized lifestyle interventions
Dementia care & caregiving	Foundational work to develop and test specific care models for efficacy & effectiveness		<ul style="list-style-type: none"> • Two intervention types for care and/or caregiver support identified as ready for broader implementation with continued evaluation • Multiple lines of study on adaptations and broader implementation of promising models

Alzheimer's Disease-Related Dementias (ADRD) Research Roundtable 2023

November 2, 2023, Bethesda, MD (& Virtual)

More than 50 attendees including from non-governmental organizations and NIH, with 24 NGOs represented and 14 people with lived experience, including 3 panelists.

Goals

- Facilitate discussion on NIH ADRD research priorities
- Provide an update on the NIH ADRD programs
- Share NGO success stories and innovative approaches to research
- Discuss shared ADRD research goals to inform vision for the ADRD Summit 2025

Meeting Sessions

- Biomarkers – Opportunities and Challenges
- Anti-Amyloid-Beta Therapies
- Networking session for NGO, PWLE, and NIH participants
- Practical Considerations in Early Detection, Treatment, and Prevention

91

NINDS ADRD Funding Opportunities

Biologic mechanisms driving ADRD

- TBI pathology as it relates to cognitive impairment/dementia,
- TBI and cognitive/dementia outcomes.
- Models for ADRD
- Role of stress as a social determinant of ADRD
- TDP Proteinopathies
- COVID 19 and ADRD
- **ARIA-**
 - BBB response to anti-amyloid antibodies

Co Pathologies

- Mechanistic studies of Multiple Etiology Dementias
- Multi target interventions for ADRD

Therapy development-

- Early phase therapy development
- Genome editing

Biomarkers

- PET ligand development.
- Multimodal biomarkers to differentially diagnose ADRD for clinical trials
- Validating digital health technologies for monitoring biomarkers in ADRD clinical trials.

Clinical Trials

Anti-amyloid therapy for AD plus vascular pathology, AD plus Lewy Body

Training

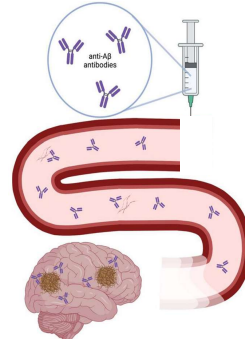

- Training program for ADRD research- T32
- Postdoc to

92

NINDS ADRD Clinical Trial Funding Opportunity

Phase III Clinical Trial: [RFA-NS-24-013](#)
Efficacy and Safety of β -Amyloid Directed Antibody Therapy in Mild Cognitive Impairment & Dementia with Evidence of Both β -Amyloid & Vascular Pathology
 Application Due Date: February 20, 2024

Contact: Dr. Rebecca Hommer (rebecca.hommer@nih.gov)

Drug name	Clinical Trial	Company	FDA Status
ADUHELM (Aducanumab)	EMERGE (NCT02484547)	Biogen	Accelerated Approval
	ENGAGE (NCT02477800)		
	PRIME (NCT01677572)		
LEQEMBI (Lecanemab-IRMB)	Clarity-AD (NCT03887455)	Esai	Traditional Approval
Donanemab	TRAILBLAZER-ALZ (NCT03367403)	Eli Lilly	Pending
	TRAILBLAZER-ALZ 2 (NCT04437511)		

Additional planned trial: Safety & Efficacy of β -Amyloid Directed Antibody Therapy in MCI & Dementia with Evidence of both β -Amyloid Pathology & Lewy Body Dementia

NINDS VCID Funding Opportunity

VCID Center Without Walls for Understanding and Leveraging Small Vessel Cerebrovascular Disease Mechanisms in ADRD (R01) [RFA-NS-24-027](#)
 Application Due Date: February 01, 2024

Contact: Dr. Roderick Corriveau (roderick.corriveau@nih.gov)

Goal is to support parallel human-based and model-based studies to advance understanding of basic disease-related molecular mechanisms related to vascular disease that contributes to clinical dementia diagnoses.

Focus is on cerebral small vessel disease related to VCID, including with single cell human tissue approaches, for atherosclerosis (direct impact or downstream), arteriolosclerosis, & cerebral amyloid angiopathy.

Future Potential of Genome Editing Therapy

HOW CRISPR GENE EDITING COULD HELP TO TREAT ALZHEIMER'S

Some researchers hope that gene editing can conquer forms of the disease that are caused by mutations.

Nature | Vol 625 | 4 January 2024 | 13

ARTICLE
<https://doi.org/10.1038/s41467-018-07971-4> OPEN

CRISPR/Cas9 editing of APP C-terminus attenuates β -cleavage and promotes α -cleavage

Jichao Sun¹, Jared Carlson-Stevermer^{2,3}, Utpal Das⁴, Minjie Shen⁵, Marion Delenclos⁶, Amanda M. Smead⁷, So Yeon Koo⁷, Lina Wang⁸, Dianhua Qiao⁹, Jonathan Lo⁹, Andrew J. Petersen⁹, Michael Stockton⁹, Anita Bhattacharyya⁹, Mathew V. Jones⁹, Xinyu Zhao⁹, Pamela J. McLean⁹, Andrew A. Sproul¹⁰, Krishanu Saha^{2,3} & Subhojit Roy^{1,9}

 National Institute of Neurological Disorders and Stroke
  National Institute on Aging

ALZHEIMER'S ASSOCIATION

AAIC >24

Subhojit Roy lab at UCSD have developed a gene-editing strategy that targets the amyloid precursor protein (APP). Depending on how it is cut by various enzymes in the brain, APP can create products that are either protective (sAPPa) or pathologic (beta amyloid). The approach hopes to reduce the production of beta amyloid while increasing neuroprotective actions.

Boris Kantor at Duke University and colleagues described an epigenome therapy platform based on CRISPR/dCas9-editing strategy intended to reduce APOE-e4. The scientists found that their lead candidate can robustly reduce the levels of APOE-e4 in both human induced pluripotent stem cell derived miniature brains from an Alzheimer's patient and humanized mouse models.

95

NINDS Alzheimer's Disease-Related Dementias (ADRD) Program

NINDS has 14 ADRD funding initiatives for FY 2024.

For more information see NINDS Focus on Alzheimer's Disease and Related Dementias page : <https://www.ninds.nih.gov/Current-Research/Focus-Disorders/Alzheimers-Related-Dementias>

No RFA is needed to apply!! NINDS special AD/ADRD payline applies to investigator-Initiated research applications to the NIH Parent R01 and the NINDS R21 (PA-21-219)

Published funding announcements will also be shared via the **NINDS ADRD Listserv**
