Dementia

AD Related Dementias

- **Frontotemporal lobar degeneration**
- **Dementia with Lewy bodies**
- **Vascular cognitive impairment-dementia**

©2014 MFMR | 3340705-3

ALZHEIMER'S DISEASE

- **Degenerative etiology**
- **Gradual progression**
- **Basic neurological exam normal early**
- **Clinical-pathology correlation 80-90%**

Criteria for AD

National Institute on Aging

Alzheimer's Association

Alzheimers and Dementia, May, 2011

Introduction to the Recommendations from the National Institute on Aging-Alzheimer's Association Workgroups on Diagnostic Guidelines for Alzheimer's Disease

Clifford R. Jack, Jr, Marilyn S. Albert, David S. Knopman,
Guy M. McKhann, Reisa A. Sperling, Maria C. Carrillo,
Bill Thies, Creighton H. Phelps

and the Alzheimer's Disease and Related Disorders Association (ADRD) workgroup in 1984 [1]. These criteria were

the pathophysiological process of AD, and changes in conceptualization regarding the clinical spectrum of the disease have occurred.

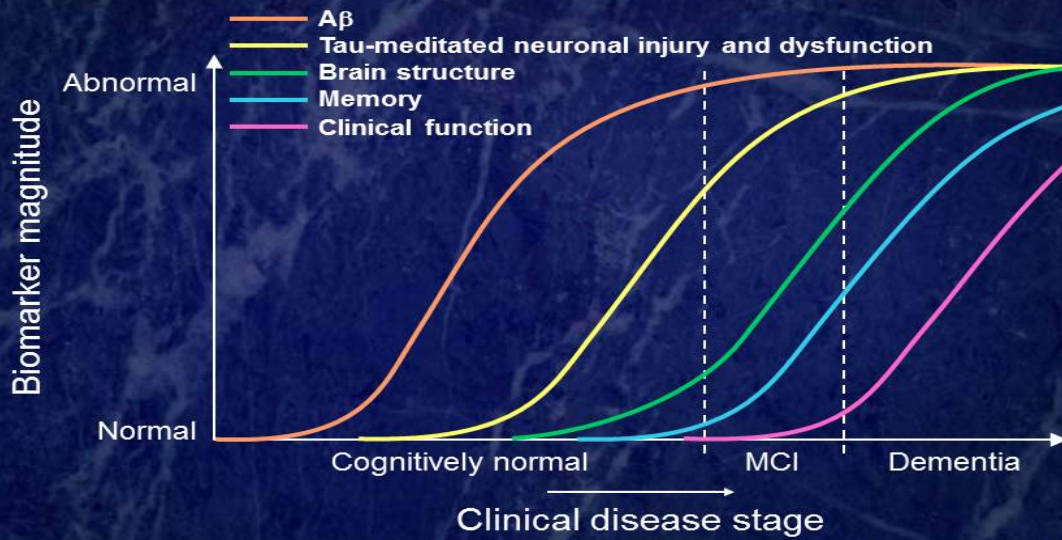

By 2009, broad consensus existed throughout academia and industry that the criteria should be revised to incorporate

Hypothetical Model of Dynamic Biomarkers of the Alzheimer's Pathological Cascade

MAYO CLINIC

Jack et al: Lancet Neurol 2010

Prevalence of PiB PET in Normals

MAYO CLINIC

Rowe et al: 2010

Biomarkers for AD

- **Early biomarkers**
 - Amyloid deposition**
 - PET imaging
 - CSF amyloid
- **Later biomarkers**
 - Neurodegeneration**
 - Structural MRI
 - FDG PET
 - Tau PET
 - CSF tau

Neuroimaging in AD

Neuroimaging in AD

- **Structural MRI**
- **Functional imaging
FDG PET**
- **Molecular imaging
Amyloid PET imaging**

Alzheimer's Disease Spectrum

Preclinical AD

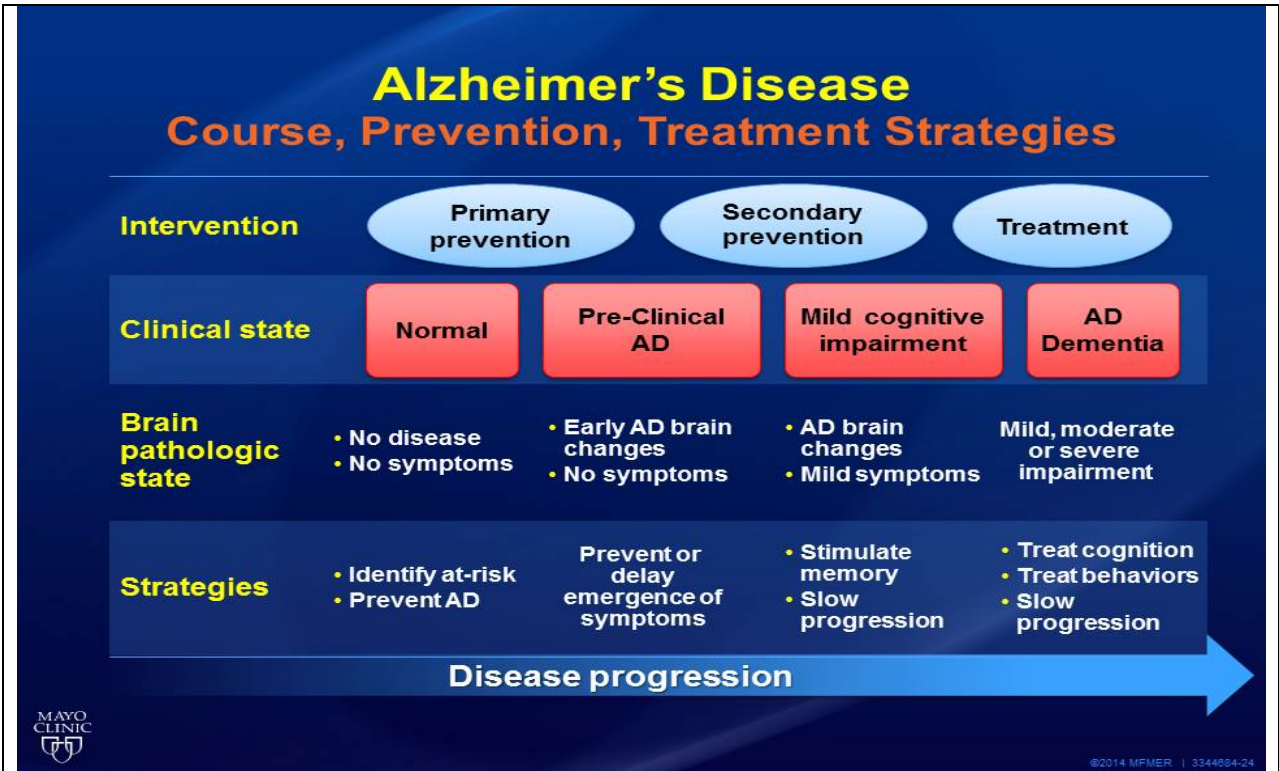

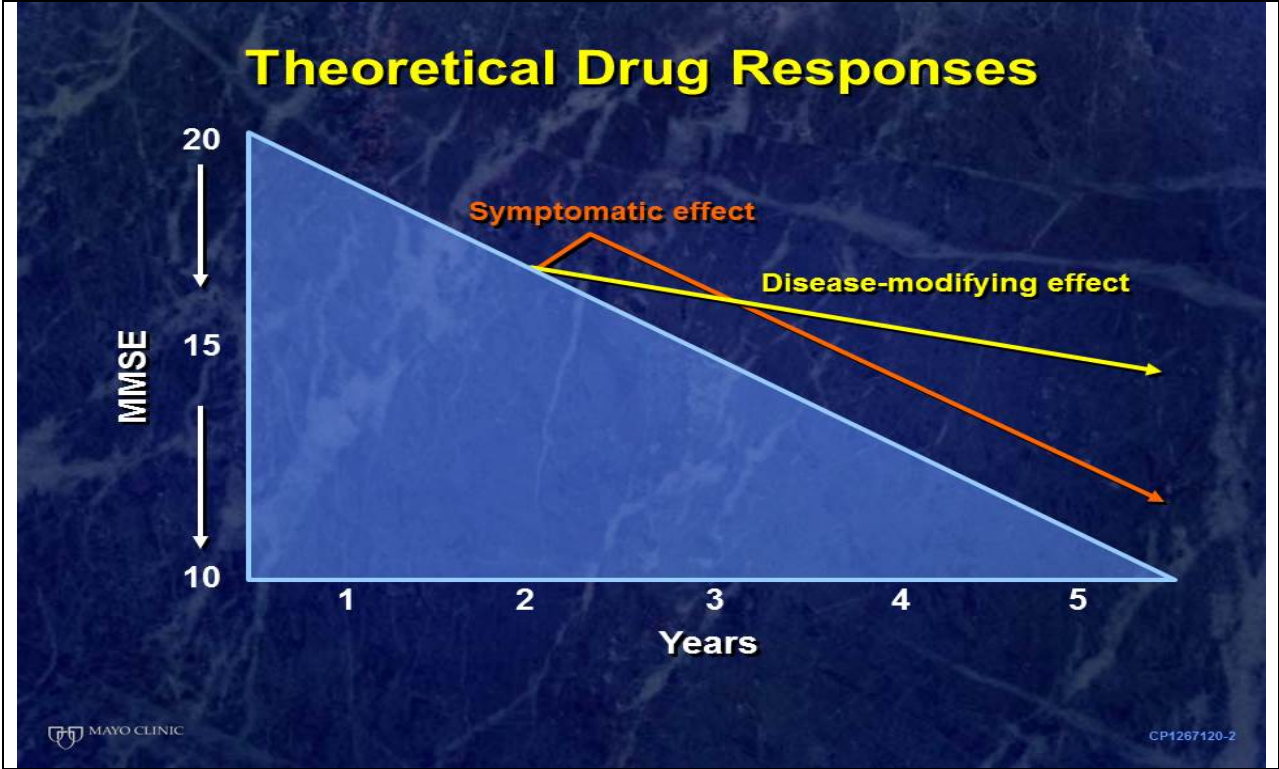

MCI Due to AD

Dementia Due to AD

Alzheimer's Disease Treatments 2015

SYMPTOM MODIFYING AGENTS

AD TREATMENTS

■ CHOLINESTERASE DRUGS

- DONEPEZIL (ARICEPT)
- RIVASTIGMINE (EXELON)
- GALANTAMINE (RAZADYNE)

■ NMDA ANTAGONIST

- MEMANTINE (NAMENDA)

Immunotherapy

- **Passive immunization**
 - Polyclonal antibodies**
 - IVIG**
 - Monoclonal antibodies**
 - bapineuzumab**
 - solanezumab**
 - crenezumab**
 - gantenerumab**
 - aducanumab**

Secretase Inhibition

- **Beta secretase inhibitors**
 - Promising**
- **Gamma secretase inhibitors**
 - Challenges**

Clinical Trials in the Era of Prevention

API DIAN-TU	API	A4	SNIFF
Autosomal Dominant 1% of AD	E4/E4 asymptomatic 2% of population	Amyloid Positive asymptomatic 30% of population aged 65+	Symptomatic MCI and Dementia 25% of population aged 65+

Lifestyle Modifications

Effect of Physical Activity on Cognitive Function

JAMA[®]

Online article and related content
current as of September 2, 2008.

Effect of Physical Activity on Cognitive Function in Older Adults at Risk for Alzheimer Disease: A Randomized Trial

Nicola T. Lautenschlager; Kay L. Cox; Leon Flicker; et al.

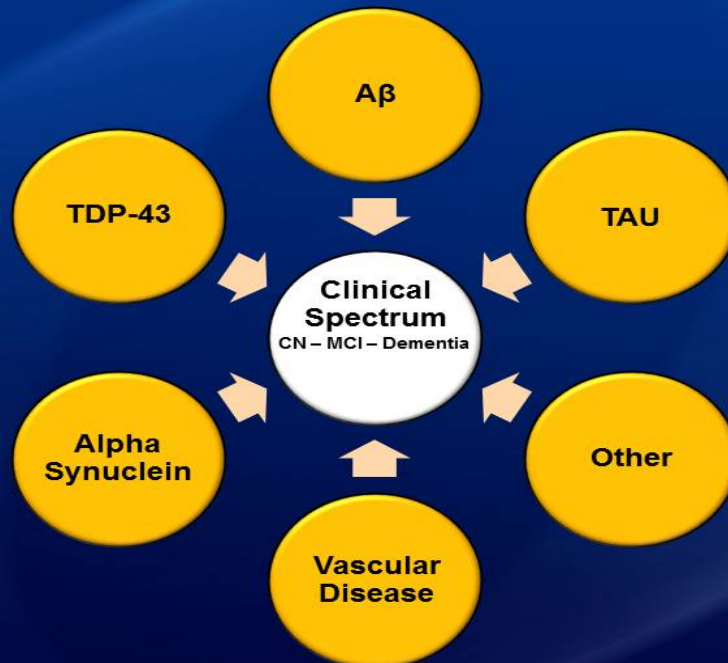

JAMA. 2008;300(9):1027-1037 (doi:10.1001/jama.300.9.1027)

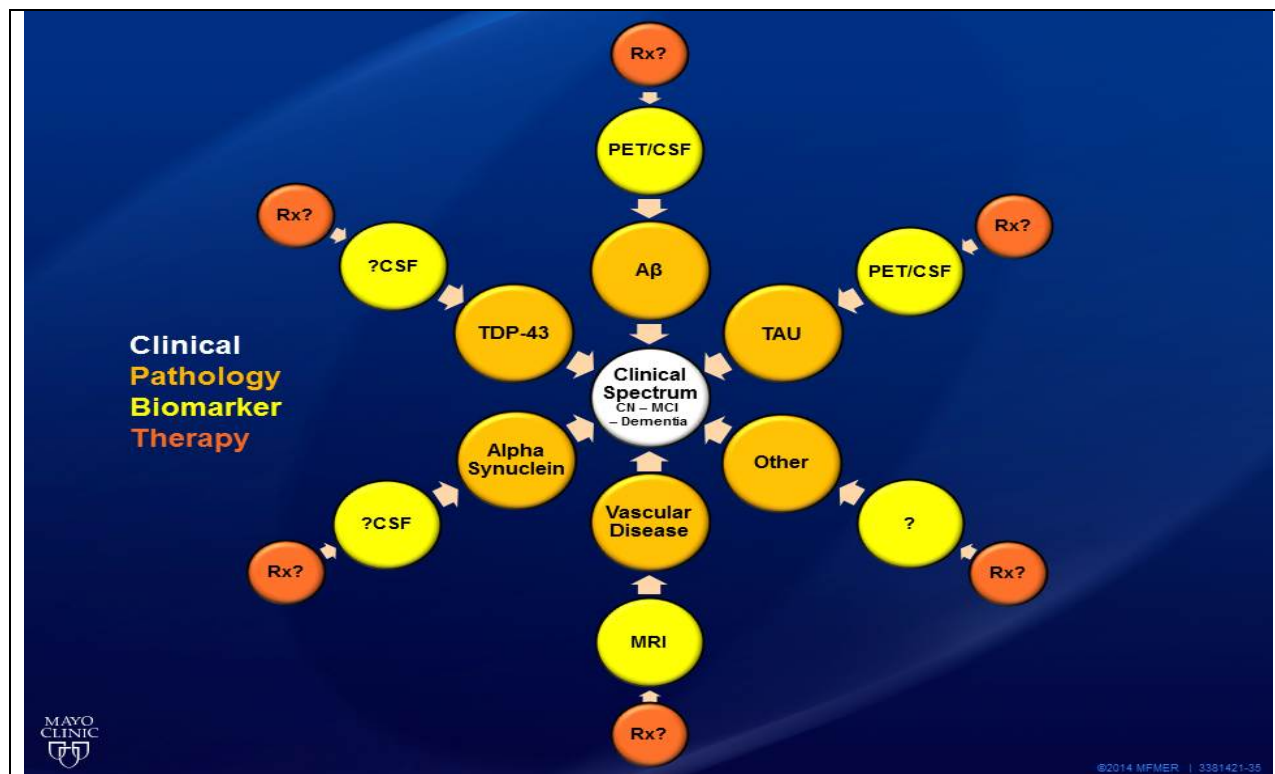

Conclusions

- Moderate exercise (150 minutes/wk) resulted in improved cognitive function at 6 months
- Some benefits maintained at 18 mos

So, where are we?

Overall Conclusions

- **We can diagnose cognitive impairment fairly well**
 - **Clinical criteria**
 - **Biomarkers**
- **Screening tools evolving**
 - **Useful in practice**

Therapies being actively pursued

Thank You
