

SPSS-Produced Documentation of Variables and Value Labels

NOTES: *Ignore column width information; ignore measurement level info;
ignore missing value information listed
Edited so that values for multiple response items are only
given for the first variable in the sequence.*

*Data for questions not asked have been recoded to -9, per conventional coding instructions;
when "don't know," "refusal" codes are in the values below,
these generally were not recoded;
when the conventional missing value codes are present,
these have been recoded from the data;
-5 indicates missing value code resulting from combination
of missing value reasons;*
