Medicaid Guidance on Unsafe Wandering and Exit-Seeking

- In December CMS issued Frequently Asked Questions to clarify how providers can assist beneficiaries with ADRD receiving home and community-based services (HCBS) to live self-determined lives in fully integrated community settings
- The guidance addresses person-centered planning, promising practices, staff training, and care delivery and includes many suggestions
- HCBS settings should not restrict individuals unless it is in the person-centered plan, all less restrictive interventions have been exhausted, and any restriction is regularly reassessed
- Thank you to Jane Tilly, who with others helped prepare this guidance!

(Strategy 2.D)

Centers for Medicare & Medicaid Services

New Data on Medicaid LTSS and Home and Community-Based Services Programs

- In November CMS released the *Medicaid Long-Term Services and Supports Beneficiaries 2012* report which provides updated estimates of the number of beneficiaries who receive Medicaid long-term services and supports, including institutional care and HCBS
- CMS also issued updates to two reports that describe recent HCBS “waiver” program data including numbers of recipients and other trends

(Strategy 2.G)

Information at: <https://www.medicaid.gov/medicaid/ltss/reports-and-evaluations/index.html> and <https://www.medicaid.gov/medicaid/ltss/reports-and-evaluations/index.html>

Centers for Medicare & Medicaid Services

Guidance on Medicaid Community First Choice State Plan HCBS Option

- In December CMS issued detailed guidance to states on the implementation of the benefit package available to states to promote community integration
- The CFC option – which states must choose- offers eligible beneficiaries the opportunity to receive personal attendant services and supports in the community
- It allows services to be available across populations and easily standardizes eligibility, needs assessment, and care coordination

(Strategy 2.G)

A Comparison of the Prevalence of Dementia in the United States in 2000 and 2012

- Between 2000 and 2012, the prevalence of dementia among those aged 65+ significantly decreased from 11.6% to 8.8%.
- Increases in the level of education among later born cohort was associated with lowered dementia risk and improvements in treatments for cardiovascular risk factors may have also played a role.

Langa, et al., 2017. *JAMA Intern Med.*

Tube Feeding in US Nursing Home Residents With Advanced Dementia, 2000-2014

Table 1. Feeding Tube Insertion Rates Among US Nursing Home Residents With Advanced Dementia in 2000 to 2014

Year	Residents With Advanced Dementia	
	With Recent Onset of Total Dependence for Eating, No.	With Feeding Tubes Over Subsequent 12 Months, No. (%)
2000	7029	820 (11.7)
2001	6738	774 (11.5)
2002	6239	701 (11.4)
2003	5518	577 (10.5)
2004	5194	462 (8.9)
2005	4628	398 (8.6)
2006	4389	393 (9.0)
2007	4110	357 (8.7)
2008	3890	331 (8.5)
2009	3842	297 (7.7)
2010	3794	283 (7.5)
2011	4538	264 (5.8)
2012	4246	235 (5.5)
2013	3685	207 (5.6)
2014	3411	193 (5.7)

Significant decreases in insertion rates from 2000 - 2014

National Institute on Aging

The Disproportionate Impact of Dementia on Family and Unpaid Caregiving to Older Adults

- Approximately 1/3 of caregivers who help older adults assist someone with dementia.
- Older adults with dementia receive approximately 5X more assistance with self-care compared to individuals without dementia.
- Intensity of dementia care (hrs/month) is higher in community settings than in residential care settings.
- Families bear the majority of caregiving responsibilities for adults with dementia, with highest care intensity for caregivers residing with individual.

THANK YOU!

February 3, 2017 -- Advisory Council Meeting #23

The meeting was held on Friday, February 3, 2017, in Washington, DC. The theme of this Advisory Council meeting was clinical trials for Alzheimer's disease and related dementias and recruitment challenges. Additional afternoon presentations included updates on progress towards a Care and Services Summit, federal workgroup updates, and preparation for the Advisory Council's 2017 Recommendations, due in April 2017. Material available from this meeting is listed below and is also available at <https://aspe.hhs.gov/advisory-council-alzheimers-research-care-and-services-meetings#Feb2017>.

Comments and questions, or alerts to broken links, should be sent to napa@hhs.gov.
