2018 Recommendations

Angela Taylor – Research Subcommittee
Gary Epstein-Lubow – Clinical Care Subcommittee
Debra Cherry – Long-Term Services and Supports Subcommittee

2017 Recommendations

‣ Compiled by the three subcommittees (Research, Clinical Care, and Long-Term Services and Supports) during their meetings in between larger Council meetings

‣ Recommendations were voted on by all the non-federal members at the April 2017 Meeting

‣ Subcommittee chairs wrote a brief overview as an introduction, Chair provided a cover letter

‣ Recommendations were sent to the Secretary and Congress in June

2

Recommendations vs. Plan

▸ Recommendations are the issues and gaps identified by the non-federal members of the Council that they think should be addressed

▸ The National Plan is the government's yearly progress report on what federal agencies have accomplished on dementia

▸ If there are Recommendations made by the Council that can be addressed by the federal agencies, they become action items in the National Plan

3

Use of the Driver Diagram

▸ Each subcommittee used their own driver diagram to help frame their recommendations
  ◦ Partners
  ◦ Timeframe
  ◦ Measures of success
  ◦ Determining overlap across themes and topic areas

▸ Once we have a final set of recommendations, we will fit them into the driver diagram so that there is one document to work from
  ◦ This will form the basis for tracking work into next year until the 2019 recommendations

4

Subcommittee Chair Meeting – 7/20

‣ Check for overlap and possible opportunities to combine and collapse
‣ Standardization of language
‣ Standardization of format
‣ Standardization of length

5

How we plan to proceed

‣ Each committee will have 30 minutes to discuss how they developed recommendations and present their recommendations
‣ Review of recommendations from each committee
‣ Discussion
‣ Major modifications on a live document
  ◦ Less focus on semantics and more on making sure important aspects are covered
‣ Vote!
