

THE MEASURE OF POVERTY

Technical Paper I

Documentation of Background Information and Rationale for Current Poverty Matrix

[This valuable Technical Paper collects a number of important articles and papers by Mollie Orshansky and others about the development and early history of the poverty thresholds. There were a few minor problems with the original Table of Contents: articles and papers were incompletely identified; there were some inconsistencies and errors in page numbers; and a few articles and papers were shown under the wrong heading. The following revised Table of Contents resolves these minor problems.]

TABLE OF CONTENTS
