

NAPA Driver Diagram - Draft

Aim	Primary Drivers	Secondary Drivers	Actions	Recommendations (2017)	Activities (Federal)
<p>Eliminate the burden of Alzheimer's Disease and Related Dementias</p>	<p>Prevent and Effectively Treat Alzheimer's Disease by 2025</p>	<p>Identify Research Priorities and Milestones</p>	<p>Robust Research Road Map for achieving Goal</p>	<p>The 2017 National Plan should continue to provide a robust, comprehensive, and transformative scientific Road Map for achieving the goal of preventing, effectively treating, and providing effective care and services for AD/ADRD by 2025</p>	<p>CMS Response CMS has supported work led by ASPE to engage in efforts to plan research summits on AD/ADRD, including a fall 2017 summit on care and services. Through the "Connected Care" campaign, CMS, working with HRSA, is raising awareness of the benefits of Medicare's CCM service for beneficiaries with multiple chronic conditions including AD/ADRD, and furnishing resources for implementation across all diverse populations. CMS is driving efforts to empower beneficiaries and their providers to make decisions, take ownership of their care, and make certain they have the information they need to make informed choices</p>
					<p>NIH Response NIH will continue to engage a broad range of stakeholders, including academia, industry, NGOs, and individuals directly affected by AD/ADRD, in advancing the goals of the National Plan. This Plan focuses on identifying effective interventions and improving care and services, and its future updates will build upon research advances and emerging opportunities, and will be informed by additional research summits as well as feedback from the broader community. Upcoming summits that will provide guidance regarding future implementation of the Plan's goals include a summit focused on AD/ADRD care and services research in October 2017, and large AD and AD/ADRD summits in 2018 and 2019, respectively. NIH leadership and staff continues to update its specific research plans and cost estimates annually, as outlined in each year's Bypass Budget for Alzheimer's Disease and Related Dementias. Part of this process involves regularly updating, implementing, and tracking a broad set of specific AD/ADRD research milestones. To enable federal agencies and other organizations to track progress in reaching these milestones, NIH has made a searchable database available to the public. The Advisory Council's recommendations regarding specific research milestones will greatly contribute to these NIH planning processes.</p>
