</table>

Notes:

As noted in Table 4A, measures of participation by month – denoted by (m) – are likely to be lower than measures of participation over a three-month quarter, and “month of exit” may mean first month without cash assistance or last month receiving cash assistance.

** The Washington Medicaid enrollment rates are for all leavers, including two-parent leavers. In Washington, both adult recipients in a two-parent household are tracked as two, separate members; and such recipients account for 19.1 percent of adult recipients in Washington in cohort 97.4.
