Notes:

\* Arizona data on income contributions by source include leavers who were off TANF for only one month. Mean household income for leavers off one month or longer was \$1,439 (including food stamps), a slightly lower level than the \$1,467 reported in Table 7A for the subgroup of leavers off two months or longer.

\*\* Missouri and Illinois data are for all leavers, including a small percentage of two-parent leavers.

\*\*\* In Arizona, Social Security disability benefits (SSDI) included under SSI and other Social Security benefits included under "other." In Missouri, the Social Security category also includes Veterans payments.
