Issue BRIEF

SECOND ADDENDUM TO THE HEALTH INSURANCE MARKETPLACE SUMMARY ENROLLMENT REPORT FOR THE INITIAL ANNUAL OPEN ENROLLMENT PERIOD

For the period: **October 1, 2013 – March 31, 2014**
(Including Additional Special Enrollment Period Activity through 4-19-14)

May 1, 2014

This Addendum contains detailed State-level data on the net change in the cumulative number of individuals who have selected a plan through the Health Insurance Marketplace (also known as Marketplace plan selections) since March 1, 2014.¹ These tables include data for states that are implementing their own Marketplaces (also known as State-Based Marketplaces or SBMs), and states with Marketplaces that are supported by or fully run by the Department of Health and Human Services (including those run in partnership with states, also known as the Federally-facilitated Marketplace or FFM).

Notes:

“N/A” means that the data for the respective metric is not yet available for a given state.

(1) Unless otherwise noted, the data in this table represents cumulative data on the total number of unique individuals who have been determined eligible to enroll in a Marketplace plan through the SBMs and FFM, and have selected a plan (with or without the first premium payment having been received by the issuer) during the reference period. This is also known as pre-effectuated enrollment.

(2) Special Enrollment Period (SEP) activity includes plan selections that were made between 4-1-14 and 4-19-14 by those who qualified for an SEP because they were “in line” on 3-31-14, as well as those who experienced a qualifying life event or a complex situation related to applying for coverage in the Marketplace. For additional methodological information, please refer to Appendix F of the Marketplace Summary Enrollment Report.

(3) Massachusetts –Massachusetts’ cumulative data for “Individuals Who Have Selected a Marketplace Plan” for the previous reporting period does not include 48,000 new applicants above 133 percent FPL who are in Temporary Subsidized Coverage; these individuals will be processed for QHP Eligibility Determination and potential coverage retroactive to the current reporting period. There are also 109,000 persons between 133 and 300 percent FPL currently in extended Commonwealth Care coverage, who were scheduled to transition to QHP coverage following October 1, 2013, but who have not been processed due to systems problems. Another 32,000 persons with income >300% FPL currently in the Commonwealth Choice program are current members who are scheduled to be processed for QHP coverage by March 31, 2014. Without the systems obstacles faced by the Massachusetts Marketplace, the number of individuals enrolled in a QHP with the Massachusetts Health Connector as of 3/1/14 might be as many as 201,000.

(4) Massachusetts –Massachusetts’ cumulative data for “Individuals Who Have Selected a Marketplace Plan” for the current reporting period does not include 160,000 new applicants above 133 percent FPL who are in Temporary Subsidized Coverage; these individuals will be processed for QHP Eligibility Determination and potential coverage retroactive to the current reporting period. There are also 112,192 persons between 133 and 300 percent FPL currently extended Commonwealth Care coverage, who were scheduled to transition to QHP coverage following October 1, 2013, but who have not been processed due to systems problems. Without the systems obstacles faced by the Massachusetts Marketplace, the number of individuals enrolled in a QHP with the Massachusetts Health Connector as of 4/15/14 might be as many as 303,000.

(5) Minnesota -- Minnesota’s cumulative data for “Individuals Who Have Selected a Marketplace Plan” do not include adults between 133% and 200% of the Federal Poverty Level (FPL) because these individuals are enrolled in the MinnesotaCare program. In addition, children up to 275% FPL are covered through the Medicaid program. Hence, when comparing Minnesota’s cumulative data for these indicators with other State-Based Marketplaces, the number of individuals determined eligible for MinnesotaCare and enrolled in MinnesotaCare are worth noting.

(6) Washington -- Washington’s cumulative “Number of Individuals Enrolled in a QHP (Plan Selection)” is an undercount, as Washington is only able to report individuals who have both enrolled in and paid for coverage.

(7) Idaho and New Mexico are Federally supported SBMs for 2014; they are using the FFM platform for 2014.
