Report on the G8 Dementia Summit

Richard J. Hodes, M.D.
U.S. Delegate
National Institute on Aging

February 3, 2014

Goal 1: Prevent and Effectively Treat Alzheimer’s Disease by 2025
Goal 2: Optimize care quality and efficiency
Goal 3: Expand patient and family support
Goal 4: Enhance public awareness and engagement
Goal 5: Track progress and drive improvement

G8 Summit Declaration and Communique
The Dementia Challenge

- set an ambition to identify a cure, or a disease-modifying therapy, for dementia by 2025
- significantly increase the amount spent on dementia research
- increase the number of people involved in clinical trials and studies on dementia
- establish a new global envoy for dementia innovation, following in the footsteps of global envoys on HIV and Aids and on Climate Change

G8 Summit Declaration and Communique
The Dementia Challenge

- develop an international action plan for research
- share information and data from dementia research studies across the G8 countries to work together and get the best return on investment in research
- encourage open access to all publicly-funded dementia research to make data and results available for further research as quickly as possible.
