**Notes**

- Population includes beneficiaries with one or more months of Part A coverage during the year, regardless of Part B coverage. Excluded from this population are those beneficiaries with any months of Medicare Advantage (Part C) during the calendar year. Additional exclusions consist of patients with End State Renal Disease (ESRD), and those beneficiaries residing outside the United States.
- Beneficiaries with selected chronic conditions were identified using algorithms developed by CMS (refer to Appendix A) to determine the presence of 27 chronic conditions for the CMS Master Beneficiary Summary File Chronic Condition Segment).
- Average monthly payments were computed for each beneficiary as the average Part A reimbursement per month for all months in which the beneficiary had Part A coverage.
