Summit Goals, Topics and Cross-Cutting Themes

Katie Maslow, MSW
The Gerontological Society of America

Summit Co-Chair

Goals of the Summit

To identify what we know and what we need to know:

- to accelerate the development, evaluation, translation, implementation, and scaling up of comprehensive care, services, and supports for persons with dementia, families, and other caregivers

- to improve quality of care and quality of life for persons with dementia and their caregivers
What do we know and what do we need to know about:

- Care needs and supportive services for persons with dementia
- Supportive approaches for family and other caregivers
- Models of care for persons with dementia and their families across the disease trajectory

How can we improve the research process

- How do we do research
- How do we identify the research questions
- How do we involve persons with dementia and caregivers as members of the research team and study participants
- What outcomes do we need to measure
- How can we move forward faster

#DementiaCareSummit
Cross-Cutting Themes

- Access
- Diversity and disparities, including gender, race, ethnicity, culture, language, literacy, sexual orientation, socio-economic status, geographic location, and living situation (alone or with a caregiver)
- Etiologies and Disease Stages
- Care Settings, including home, community, assisted living, nursing home, and health care settings
- Employment, training, and workforce
- Technology

Heterogeneity of persons with dementia, caregivers, and caregiving situations

- One size clearly does not fit all
- How can we effectively and efficiently match care, services, and supports to the diverse needs of persons with dementia and their family caregivers
What’s not covered

- Detection and diagnosis
  For the summit, we include as “persons with dementia” individuals who have a dementia diagnosis and individuals who have cognitive and functional impairment consistent with dementia but no formal diagnosis

- In depth focus on ongoing medical management of the person’s dementia and co-existing medical conditions

Your interest, ideas, and involvement are critical

Thank you for being here in-person and online
