OMB #: 0990-0226
A federal agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The valid OMB control number for this information collection is 0990-0226. Public reporting burden for this collection of information is estimated to vary from 2 to 4 minutes with an average of 3 minutes per response, including time for reviewing instruction, searching existing data sources, gathering and maintaining the necessary data, and completing and reviewing the collection of information.

Information contained on this form which would permit identification of any individual or establishment has been collected with a guarantee that it will be held in strict confidence, will be used only for purposes stated for this study, and will not be disclosed or released to others without the consent of the individual or establishment. Responses to the collection of the information are voluntary.
PURPOSE: This information is being collected in order to obtain demographic data on Care Providers participating in the data collection of the OASIS and Care Provider Questionnaire. This information will be used for descriptive purposes and for various analyses involving Care Provider characteristics.

HOW COLLECTED: This questionnaire will be completed by each Care Provider participating in the study.

WHEN COLLECTED: The CPP should be completed only once by each Care Provider participating in the study. This should be done by the Care Provider at the onset of the study prior to completion of any other study questionnaires. As new Care Providers join the study, after the study has begun, they will need to complete the CPP prior to completion of any other study questionnaires.

INSTRUCTIONS: The Care Provider completes the CPP her/himself, and answers are to be recorded directly on the instrument. The Care Provider should mark the correct response as appropriate or print numbers/answers where requested. All questions should be answered unless specifically directed to skip questions based on a previous answer.
