Child care research is being undertaken across the Department of Health and Human Services (HHS). This table reflects an inventory of currently or recently funded research efforts in the Office of the Assistant Secretary for Planning and Evaluation (ASPE), the Administration for Children and Families (ACF), the National Institute for Child Health and Human Development (NICHD), and the Office of the Inspector General (OIG). This is a work in progress and may not be inclusive of all HHS research. Efforts will be made to identify other child care research both within HHS and being conducted and supported by other private and public funds. To include child care research in future inventories, please email or fax a description of the research with relevant contact information to Jody McCoy (jmccoy@osaspe.dhhs.gov; 202-690-5514).

<tr>
<td>Study of Infant Child Care Under Welfare Reform</td>
<td>The purpose of this project is to learn about the challenges for parents and the states in meeting the child care needs of infants in welfare families. The study will consider the factors affecting parents moving from welfare to work as well as those attending school/training programs; will examine how states are meeting these challenges with the assistance of businesses, schools, and community organizations; and will explore the supply of and demand for such care, and the infant care arrangements parents choose.</td>

| How is Welfare Reform Influencing Child Care Supply and Parental Choices?   | This project involves two sub-studies to track the unfolding of welfare reform and related changes in child care markets as well as how these changes may be affecting children's early development. First, how is the availability and quality of preschool and child care facilities changing? Second, how are welfare families in Connecticut selecting different types of care, how are these decisions related to children's early learning and development, and how do the contextual dynamics of community child care supply affect family decisions? | ACF 9/30/97 to 9/30/01    | California Child Care Resource and Referral Network

| Neighborhoods, Parent Involvement and Child Outcomes for Low-Income Families: A Comparison of Head Start with Other Programs | This partnership brings together three distinctive databases on low-income families and children. These databases are being merged to study factors related to the supply of early child care services including Head Start, preschool, and different forms of center or family-based care and their use by low-income families. A particular interest is how parental involvement in the child’s out-of-home care or early education program relates to sustainability of positive developmental outcomes as children enter kindergarten and elementary school. | ACF 9/30/97 to 9/30/01    | Harvard School of Public Health

<td>The NICHD Study of Early Child Care</td>
<td>The goal of Phase II of the NICHD Study of Early Child Care is to extend a collaborative (10-site) prospective longitudinal study of a cohort of 1247 children and their families, first enrolled at one month of age and studied intensively through age 3 (Phase I). The investigators propose to follow these subjects through first grade in order to investigate: (a) the effects of early alternate care (defined in terms of quality, quantity, type, onset age, and stability) on children's development during the preschool years and the transition to school; (b) the ways in which the effects of early alternate care are moderated by child characteristics and by experiences in the family and in school; and (c) the mediating processes linking early alternate care experiences with later outcomes.</td>
<td>NICHD 1991 to present</td>
<td>Early Child Care Network; Early Child Care Network; various investigators. Contact the Public Information and Communication Branch at NICHD [Building 31, 2A32, 31 Center Drive, MSC 2425, Bethesda, MD 20892-2425] for information on individuals involved.</td>

| Predictors and Adjustment Outcomes of After-school Care | This study will investigate the developmental histories and behavioral consequences of after school care of 570, 9 to 11 year old European-American and African-American children since kindergarten. The data analysis will focus on the concurrent and cumulative effects of after school care on children's behavioral and psychological adjustment and the degree to which these effects are moderated by geographic location, community risk, parent child relationships, child characteristics, and family demographic characteristics. | NICHD 1993 to present               | Gregory S. | Role of Child Care in Low-Income Families’ Labor Market Participation | This project developed optional research designs to identify and address child care services needed by parents to succeed at work, keeping in mind the role quality care plays in childrens' and parents' lives. The major work under this contract also consists of a series of stand-alone working papers on quality, cost, and flexibility that critically evaluate relevant research related to child care and labor force attachment, and that develops the rationale for the factors included in the research designs. | ACF

<tr>
<td>An Economic Rationale for Government Intervention in the Child Care Market</td>
<td>The purpose of this project is to describe the child care market for low-income families, examine the failures of that market, and to discuss the effectiveness of different types of government interventions in the child care market. It will also examine the long-term economic costs to society of failing to provide child care that meets basic health and safety of children.</td>

<tr>
<td>After-school Care and Child Development</td>
<td>This is a longitudinal five year study of 150 children from first through he fifth grades enrolled in formal after-school programs. Child outcomes to be studied in relation to these after-school experiences include academic and conduct grades, achievement test scores, work habits, self esteem, depression, behavior problems, peer relationships, and loneliness.</td>

<tr>
<td>Child Support, Child Care and Child Well-being</td>
<td>The first part of this study explored the relationships between child support awards, the non-custodial parent's (NCP) willingness to pay child support, state enforcement efforts, and compliance with the awards. The second part investigates the effect of the Child Care Tax Credit (CCTC) in the U.S. income tax system on the labor supply decisions of mothers with young children and on the choice of child care.</td>

<tr>
<td>Welfare Reform and the Well-being of Children</td>
<td>This project studied the effects of welfare reform on children in three important Northeastern and Midwestern cities, Baltimore, Boston, and Chicago, over a five-year period. The conceptual framework is the economic household production model, supplemented with perspectives on child development drawn from the developmental psychology literature and informed by insights from ethnographic research.</td>

</tr>
<tr>
<td>Family and Child Well-being Research Network</td>
<td>The aim of this proposal is to elucidate the familial and extra-familial factors that influence the well-being of children (and their parents) during two developmental periods -- the early childhood years and the early elementary school years. Of particular interest is understanding how familial and extra-familial factors interact with poverty and household structure (single parent, father present, other adult present), and maternal employment to produce child and parent outcomes.</td>

<tr>
<td>Demand for and Supply of Quality in Care</td>
<td>The goals of this project are to study the effects of family and child characteristics and the attributes of child care arrangements on the well-being of children and those that affect convenience, reliability, and other features not directly associated with child well-being. These estimates will provide the information needed to assess the demand for quality in child care, and how the demand for quality in child care would be affected by changes in government child care policies.</td>
